

HIGH-QUALITY PRODUCT !

for the bicycle fork

for the springed seat pillars

BRUNOX® Deo

*recommended by
champions !*

BRUNOX® and ROCK SHOX®, the market leaders in the branches anti-corrosion products and spring systems for bikes, have co-operated together and launch the special bicycle-fork-spray, **BRUNOX® Deo for the bicycle fork**, that is also recommended by SITTING BULL®.

The product name with the addition **Deo** stands for:
easy care with great effect.

Like the daily tooth care for protection against caries and „Parodontose“, so the functionality and the working durance of a bicycle fork will be guaranteed only through often and regular care. A little BRUNOX® Deo is sprayed on between submerge- and stand-pipe before and after each tour. Afterwards, spring the fork shortly for several times and you can see suddenly the difference.

BRUNOX® Deo keeps the sealing rings in soft condition and does not adhesive dust. Optimal conditions for best performance. BRUNOX® Deo has an excellent penetration ability because of the additive TURBOLINE, keeps the sealing rings smooth, so that you can execute your work even better.
